

03 February 2019

Dear World,

Sadly I am feeling under the weather today and have only had the willpower to sleep. I am writing my vlog out but do not worry my video should be up this week. This week has yet been another great week. I am truly grateful to ken for coming in the mornings and teaching us extra if needed. Html and css has been a lot of fun . I will say with practice I will get better. Monday I had my very first book club movie night where my members and I came in our pajamas and watched a really awesome film about bullying . It made my night to see Cierra there in her onsie with me. Towards the end of the movie the whole row was in tears.

Tuesday was a regular tuesday this week, Not many extracurriculars took place. I am interested in helping out on tuesday with St.jude and Code Crew. I am aware they come to the Crosstown every Tuesday and working at St. Jude is a dream job for me so i am willing to help anyway I can.

Wednesday I had a very productive day. Took advantage of the early morning study session and got pyros with my friends at school. It was probably the first time i ever got back late and now we know to never go to pyros . Lucky, we were working on list and ordered list. Probably the easiest lesson of all programming. After class I had a meeting with Athena who is the vice president of my book Cub. We went to go eat at phuon long which is a vietnamese restaurant right across crosstown. We had a pretty nice time and their food was so good. I ordered exactly the same thing they ordered which was the lemongrass tofu. It was stir fried tofu with onion and garlic sauce. It was so good i ate it 3 times this week, no exaggeration. I need to stop eating out because i am slowly running out of funds and I try to stay away from working during the week because of school. I will say food is the highest cost for me. I guess i should go back to eating my noodle packs for a dollar.

Thursday was the busiest day for me because i woke up at 6:30 am went to the study session and also went to work that same day. You will shortly understand why i dislike working and going to school. Right after class i go to work at Red koi japanese Cuisine and i tend to have to stay until around 10pm because i'm also the person who closes. I got some followers at work who support my youtube channel. I wonder if anyone noticed that a video was not posted today. School is getting much better, my day was not going to well today. I was very flattered that the teachers noticed my less enthusiasm in class and it actually made me feel better.

Ahh Friday, the best day of the week. I was able to wake up early as habit and grabbed breakfast with Itayana at CKS coffee shop next to class. For some odd reason my hair continued to smell like CKS the rest of the day. I had a lot of fun with the lesson today..Grid was a little confusing for me but it's probably because i didn't play the game for homework. I will say grid was not very understanding but i enjoyed making tables . The table assignment was probably the second easiest to ordered list and unordered list. Since then i have been sick and trying to be fully recovered for class tomorrow. It used to be that when I would get sick i would be sick for weeks, but i think my immune system has improved a lot after moving away from a really bad home that didn't really live up to healthy living standards. I had to cancel my trip to nashville and wasn't able to attend the Black Girls Code Event. But there will be more and I will not miss the next one.

Happy Super Bowl Sunday
